Company: E2open

Location: Apac

Category: computer-and-mathematical

E2open is the connected supply chain platform that enables the world's largest companies to transform the way they make, move, and sell goods and services. We connect more than 400,000 partners as one multi-enterprise network. Powered by the network, data, and applications, our SaaS platform anticipates disruptions and opportunities to help companies improve efficiency, reduce waste, and operate sustainably. Our employees around the world are focused on delivering enduring value for our clients.

Staff Implementation Engineering

Location: Bangalore

Description

This Staff Implementation Engineer role is responsible for configuring and customizing E2open's Intelligent Application Suite in line with the E2open's direction and customers' business needs. The Staff implementation Engineer will work in a team of project manager, architects, application engineers and testers in the full SDLC cycle including requirements gathering, solution design and development, user acceptance testing and solution implementation.

Responsibilities:

As a Staff Implementation Engineer, you will be part of our IT projects and contribute actively to the launch of our SCM solutions.

You will be a self-starter and contribute to implementing solutions to complex business processes and the integration of our SCM software products.

Capable of analyzing and providing solutions to complex tasks, adhering to best practices, and enhancing them further.

Minimum 5-to-9 years' experience in software development, data integration, testing/validation, and documentation

Lead and participate in customer facing meetings, design sessions and system & user testing.

Working in Agile product & project deployment is a plus.

Qualifications, Skills, and Experience:

Strong E2Open skills in E2PR, DH, DX, and integration experience with SnOP demand planning & DISCP supplier collaboration

Strong programming skills in SQL, JAVA, Groovy, Python, SQL, and Basic knowledge of Linux,

Some exposure to Integration involving XML, API, Webservice & B2b Protocols like EDI, XML

Understanding of SDLC. Capacity for teamwork, analytical skills, creativity, and willingness to acquire new skills.

Understand business requirements and contribute to design by collaborating with Eng Lead

Capable of work closely with R&D and PDM teams

Some understanding of software development lifecycle and experience in working with multiple cross functional teams

Strong communication skills in the local language, English and any other international language is a plus.

Your Opportunity

You can expect a friendly, dynamic, and international team of consultants and software developers who are all dedicated to the same goal: to create something outstanding, something big.

Your personal and professional development is an integral part of our corporate philosophy.

Our lean and agile processes allow you to unfold and witness how famous companies benefit from your work and ideas.

Teamwork and team spirit are important company principles and lead to a pleasant working atmosphere.

You would develop a solid understanding of E2open integration technology as part of ramping up into a capable Engineering lead role.
